Professional Summary

Aspiring Junior Web Developer / Software Developer with foundational and project-based experience in **HTML, CSS, JavaScript**, Bootstrap, Python, and SQL, and hands-on exposure to **Generative AI** application development (OpenAI API, Google Gemini API, LangChain, RAG). Experienced across the full development cycle – from UI/UX design in Figma to building and deploying responsive web pages and Python-based applications. Quick learner with a strong foundation in full-stack fundamentals and a growing interest in AI-driven interfaces.

Technical Skills

Web Development: HTML5, CSS3, JavaScript, Bootstrap, Responsive Web Design

Languages: Python, SQL

AI / Generative AI: OpenAI API, Google Gemini API, LangChain, LangGraph, RAG (Retrieval-Augmented Generation), Prompt Engineering, MCP Server Basics

Databases: MySQL, ChromaDB (Vector Database)

Frameworks & Tools: Flask, FastAPI, Flask-CORS, Git/GitHub, Figma

UI/UX: Wireframing, Prototyping, Mobile & Web App UI Design

Soft Skills: Leadership, Teamwork, Time Management, Problem-Solving

Experience

Reunyte Services

Software Engineer Intern

Remote / India

January 2026 – August 2026

- Developed and maintained 3+ full-stack web applications using **HTML, CSS, JavaScript**, Flask, and MySQL, following standard development practices from design to deployment.
- Built 2+ Generative AI features using Gemini and OpenAI APIs for Q&A, content generation, and automation.
- Converted 20+ Figma designs into responsive, reusable UI components using Bootstrap and JavaScript, improving usability and user experience metrics.

Projects

AI Document Question Answering Chatbot | *Python, FastAPI, React, LangChain, ChromaDB*

GitHub

- Built a **RAG-based** chatbot to answer questions from uploaded PDF documents using semantic retrieval.
- Implemented document parsing, embeddings, and vector search using ChromaDB and LangChain, with a React-based front end.

BookMyShow Clone – Landing Page | *HTML, CSS, JavaScript*

March 2026

- Built a responsive landing page with movie listings, banners, and a clean, user-friendly UI.

Code Editor | *Python, Flask, Flask-CORS, JavaScript*

March 2025

- Engineered an online code editor supporting frontend and Python code with real-time error checking and templates, backed by a Flask-CORS API.

House Price Prediction System | *Python, Machine Learning, Streamlit*

Live Project

- Implemented a regression-based ML model for house price prediction with a web interface for real-time user input.

UI/UX Design Projects | *Figma*

2024 – 2025

- Designed multiple mobile and web app UI/UX flows – Travel, Food Delivery, Fitness, and Learning Platform apps – focused on clean layout and usability.

Education

Rajendra Mane College of Engineering and Technology, University of Mumbai

B.E. in Computer Engineering — CGPI: 7.26

Maharashtra, India

2022 – Present

Achievements and Extracurricular

NxtWave Journey – Full Stack Web Development

- Completed multiple projects and certifications in frontend and backend technologies; attended 3+ workshops, including two AI Mega Workshops.
- Certificates: Build Your Own Static Website, Build Your Own Responsive Website, Introduction to Databases, UI/UX Design (Udemy), Python.

Team Full Throttle (*tft.racing*) — National Level Go-Kart Racing Team

Documentation Head & Driver

- Contributed to go-kart design, documentation, and on-track performance; participated in national-level events including GKDC Season 11–13.
