

SANTOSH TAMBE

AI Engineer | Prompt Engineering, LLMs, Conversational AI, RAG | Pune
tambesantosh9420032829@gmail.com | +91-8767380833 | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

Professional Summary

AI Engineer with hands-on experience designing and tuning system prompts to control LLM behavior across multi-turn conversational agents, built with OpenAI and Google Gemini APIs. Experienced building chatbot and agentic conversation flows using LangChain and LangGraph, integrating REST APIs, and writing Python backend scripts for data pre-processing. Treats prompt design and clean data inputs as the primary levers for response quality.

Skills Summary

- **Languages:** Python, SQL
- **Prompt Engineering:** System Prompt Design, Multi-Turn Conversation Flows, LLM Behavior Control, Output Reliability Tuning
- **GenAI & LLM:** OpenAI API, Google Gemini API, RAG, LangChain, LangGraph, Tool Calling, Agentic Workflows
- **Backend & APIs:** FastAPI, Flask, REST API Integration, Backend Scripting, Data Pre-Processing
- **Databases:** MySQL, SQL, ChromaDB (Vector Database)
- **Tools & Platforms:** Git, GitHub, Docker, VS Code
- **Soft Skills:** Communication, Analytical Thinking, Attention to Detail, Iterative Problem Solving

Experience

Software Engineer Intern | Reunyte Services

January 2026 – August 2026

- Delivered reliable AI-driven Q&A and content-generation features, as measured by 2+ Generative AI capabilities shipped to production, by designing and iteratively refining system prompts for the OpenAI API and Google Gemini API.
- Shipped 3+ AI-powered, full-stack applications, as measured by successful end-to-end deployment, by writing Python backend logic and integrating REST APIs with a MySQL database for clean, reliable data inputs.
- Improved output quality across AI features, as measured by successful delivery across 20+ build-and-review iterations, by running a test-and-iterate loop on prompt and data logic based on observed failure cases.

Projects

AI Document Question Answering Chatbot

Python, FastAPI, React, RAG, OpenAI API, Google Gemini API, LangChain, ChromaDB | [GitHub](#)

- Built a multi-turn conversational chatbot that answers user questions from uploaded documents, tuning system prompts to control tone, answer length, and response reliability.
- Implemented a RAG pipeline (chunking, embeddings, vector search with ChromaDB) to ground responses in source data, treating clean retrieval as the primary driver of answer quality.
- Iterated on prompt and retrieval logic based on observed failure cases to reduce incorrect or off-topic responses.

Python Autonomous AI Agent

Python, FastAPI, OpenAI API, Google Gemini API, LangGraph, LangChain, Docker | [GitHub](#)

- Designed reusable multi-step conversation and reasoning flows, using LangGraph and LangChain to manage variables, memory, and tool calling across turns.
- Wrote Python backend scripts to pre-process inputs and exposed agent capabilities through REST APIs built with FastAPI.

House Price Prediction System

Python, Machine Learning, Streamlit | [GitHub](#)

- Developed a machine learning model for price computation, improving accuracy through data preprocessing and feature engineering, and deployed it via an interactive Streamlit application.

Education

B.E. in Computer Engineering

2022 – 2026

Rajendra Mane College of Engineering and Technology, University of Mumbai, India | CGPI: 7.35

Certifications & Training

- NxtWave CCBP 4.0 Academy – Generative AI, Python Programming, SQL, JavaScript, DSA
- TCS iON National Qualifier Test (NQT) – IT, May 2026 – Programming (Python), Overall Score 60.11%

Activities and Achievements

- Docs Management & Driver, Team Full Throttle (tft_racing), National Level Go-Kart Racing Team, Nov 2023 – May 2026: Led documentation and design reporting for a 20+ member engineering team. Participant, GKDC Seasons 11–13 (2024–2026).
